

**EXECUTIVE SUMMARY OF CHANGES
SUPERINTENDENT'S PROPOSED COMPENDIUM
2012
WRANGELL-ST. ELIAS NATIONAL PARK AND PRESERVE**

Wrangell-St. Elias National Park and Preserve is seeking public comment on the park's proposed 2012 Superintendent's Compendium. The attached proposed compendium is a written compilation of designations, closures, permit requirements and other restrictions adopted under the Superintendent's discretionary authority. After review and consideration of the need for annual updates, the following changes are proposed.

2.4(a)(2)(i) Carrying, using, or possessing weapons

This section has been modified to clarify that public use cabins are not considered federal facilities where firearms are prohibited.

2.10(d) Food storage: designated areas and methods

The NPS received feedback suggesting this provision could be modified to provide the superintendent discretion to accommodate other appropriate food storage practices as well as the ability to make exceptions on a case by case basis when complying with the requirements would be overly burdensome or impossible and would not pose an undue risk of wildlife obtaining food from humans. The NPS is proposing to modify this provision to allow the superintendent to make exceptions or authorize other practices on a case by case basis.

The reasons for this change include:

- A public safety and resource conservation concern exists when wildlife obtain food from people or associate humans with any form of nutritional reward. The intent of the regulations is to prevent wildlife from obtaining food from humans or associating humans with food.
- The NPS recognizes that other storage practices may be appropriate and deviations from this policy may be warranted in certain circumstances.

3.14(a) Conditions for removing sunken, grounded, or disabled vessels

This section was modified to make clear that a permit is not required for vessels that can be simply bailed out, ungrounded, or repaired on site safely by the operator if there is no potential for damage to resources.

13.25(c) Designated campgrounds: restrictions, terms, and conditions

This section was modified to add a restriction on discharging a firearm at the newly established Kendesnii Campground.

The reasons for these restrictions are as follows:

- The Kendesnii Campground is the only designated campground in the park/preserve, so high visitor use is expected.

- Increased visitation occurs during the period of May through September because of hunting, fishing and berry picking activities.
- Because of the close proximity to Nabesna Road and the anticipated high visitor use in the campground during this period of time, discharging firearms poses a serious public safety concern.

The reasons less restrictive measures will not be effective are as follows:

- The proposed language represents the least restrictive measure in that the restrictions will only be in place during the period of highest visitor use in the campground. Prohibiting the discharge of firearms will protect visitor experience and provide for public safety in a designated campground.
- Although State law prohibits hunters from shooting from or across roadways, the roadway within the Kendesnii Campground is limited, and the nature of use in the area would continue to place people at risk.
- The restriction will only be in place on federal lands in the Kendesnii Campground and only during summer months, when there are higher concentrations of visitors, summer residents, and employees in this area which elevates safety concerns over the discharge of firearms.
- Any subsistence hunting activity that does not require the discharge of a firearm within this limited area would not be affected by this proposed restriction.

**WRANGELL-ST. ELIAS NATIONAL PARK AND PRESERVE
PROPOSED COMPENDIUM
2012**

National Park Service (NPS) regulations applicable to the protection and equitable public use of units of the National Park System grant specified authorities to a park superintendent to allow or restrict certain activities. NPS regulations are found in Titles 36 and 43 of the Code of Federal Regulations (CFR) and created under authority and responsibility granted the Secretary of Interior in Titles 16 and 18 of the United States Code. The following compendium comprises a listing of NPS regulations that provides the Superintendent with discretionary authority to make designations or impose public use restrictions or conditions in park areas. The applicability and scope of the compendium is articulated in 36 CFR Sections 1.2 and 13.2, and 43 CFR Section 36.1.

The larger body of NPS regulations that do not provide discretionary authority to the Superintendent is not cited in this compendium. A complete and accurate picture of regulations governing use and protection of the unit can only be gained by viewing this compendium in context with the full body of applicable regulations found in Titles 36 and 43 CFR. *Please contact Wrangell-St. Elias National Park and Preserve, Copper Center, Alaska at (907) 822-7210 for questions relating to information provided in this compendium.*

TITLE 36 CODE OF FEDERAL REGULATIONS

PART 1. GENERAL PROVISIONS

1.5 Closures and public use limits

(a)(1) Visiting hours, public use limits, closures

The Commissioner's Cabin and Women's Jail Cabin at Chisana, the Operations Center and Cook Cabin at May Creek, and the Freed Property research camp in Slana are restricted to administrative use, and are not available to the general public.

See also 13.1906 for the Headquarters/Visitor Center Developed Area.

See specific sections in this document for additional information regarding visiting hours, public use limits, and closures.

(a)(2) Designated areas for specific use or activity or conditions

In order to prevent spreading White-Nose Syndrome (WNS) to bats, any person entering a cave or any part or passage of any cave, except glacier ice caves, shall

1. Ensure all gear, equipment, and clothing are not contaminated with the fungus associated with WNS by either
 - a). Utilizing only gear, equipment, and clothing that has not been used to enter caves outside of Wrangell-St. Elias National Park and Preserve (WRST), **or**
 - b). utilizing only gear, equipment, and clothing that has been entirely disinfected in accordance with the latest approved protocols which are found at <http://www.fws.gov/WhiteNoseSyndrome/caves.html>. These procedures are also available at NPS visitor centers
2. Contact WRST headquarters at 907-822-5234 at least 72 hours prior to entering a cave.

See specific sections in this document for additional information regarding designated areas and conditions for engaging in certain activities.

1.6(f) Compilation of activities requiring a permit

- Scientific research, 1.5
- Collecting research specimens, 2.5
- Operating a power saw in developed areas, 2.12(a)(2)
- Operating a portable motor or engine in undeveloped areas, 2.12(a)(3)
- Operating a public address system, 2.12(a)(4)
- Air delivery, 2.17(a)(3)
- Noncommercial soliciting, 2.37
- Using, possessing, storing, or transporting explosives, blasting agents, or explosive materials, 2.38(a)
- Using or possessing fireworks and firecrackers, 2.38(b)
- Special events, 2.50(a)
- Demonstrations involving 26 or more persons, 2.51
- Sale and distribution of printed matter for First Amendment purposes by groups of 26 or more persons, 2.52
- Grazing, 2.60(a)(1), (2)
- Residing on federal lands, 2.61(a)
- Installing a monument or other commemorative installation, 2.62(a)
- Towing a person using a parasail, hang glider, or other airborne device, 3.12(b)
- Removing sunken, grounded, or disabled vessels, 3.14(a)
- Operating a submersible, 3.19
- Commercial notices or advertisements, 5.1
- Commercial operations, 5.3
- Commercial photography or filming, 5.5
- Construction or repair of any building, structure, facility, road, trail, or airstrip on federal lands, 5.7
- Mining operations (9.9(a)) or an approved Plan of Operations (in lieu of permit))

- Cabins on federal lands, 13.100-13.188
- Subsistence use in the Park by person who does not live within the Park boundary or a resident zone community, 13.440(a)
- Using aircraft access for subsistence activities in the Park, 13.450(a), 13.450(b)(1), 13.3002(a)(3)
- Cutting of live standing timber greater than 3 inches in diameter for non-commercial subsistence uses, 13.485(a)(1)
- Access to inholdings where access is not made by aircraft, snowmachine, motorboat or non-motorized surface transportation, 43 CFR 36.10(b)
- Salvaging, removing, possessing aircraft, 43 CFR 36.11 (f)(3)(ii)
- Helicopter landings, 43 CFR 36.11(f)(4)
- Off-road vehicle (ORV) use, 43 CFR 36.11(g)(2)
- Temporary access across federal land for survey, geophysical or exploratory work, 43 CFR 36.12(c)

PART 2. RESOURCE PROTECTION, PUBLIC USE AND RECREATION

2.1(a)(4) Designated areas for collection of dead wood on the ground for firewood

Superseded by 13.35(c)(4), 13.35(d), and 13.485(b).

2.1(a)(5) Designated areas and conditions for walking on, climbing, entering, ascending, descending, or traversing an archeological or cultural resource, monument, or statue

No designated areas or conditions.

See 13.1904 for Kennecott Mines National Historic Landmark.

2.1(b) Designated trails

No restrictions on walking or hiking.

2.1(c)(1)-(3) Designated fruits, nuts, berries, and unoccupied seashells to harvest by hand and collection restrictions

Superseded by 13.35(c) and 13.485(b).

2.2(d) Established conditions and procedures for transporting lawfully taken wildlife through park areas

See also 13.40(d)(5).

2.2(e) Designated areas for wildlife viewing with artificial light

No areas designated for closure.

2.3(d)(2) Fresh waters designated as open to bait fishing with live or dead minnows or other bait fish, amphibians, nonpreserved fish eggs or fish roe

No waters are designated as open to fishing with the types of bait identified above. Other types of bait may be used in accordance with state law. Subsistence fishing by federally qualified rural residents is allowed in accordance with 36 CFR part 13 and 50 CFR part 100.

2.3(d)(8) Designated areas open for fishing from motor road bridges and public boat docks

All areas are designated as open for fishing from motor road bridges and boat docks.

2.4(a)(2)(i) Carrying, using, or possessing weapons

Individuals are authorized to possess firearms in NPS areas in accordance with applicable state and federal law. With the exception of public use cabins, possession of firearms is prohibited in Federally owned or leased buildings. The laws regarding discharge of firearms remain unchanged.

2.10(a) Camping: conditions and permits

Superseded in part by 13.25.

See also 13.1904 for conditions specific to Kennecott Mines National Historic Landmark (KNHL) and the mill site within KNHL.

2.10(d) Food storage: designated areas and methods

(1) Definition: A *bear resistant container* (BRC) means an item constructed to prevent access by a bear. BRC's include—

- Items approved by the Department of Interior and Agriculture's Interagency Grizzly Bear Committee (<http://www.igbconline.org/html/safety.html>);
- Any additional items listed by the State of Alaska, Department of Fish and Game, Division of Wildlife Conservation (<http://www.wildlife.alaska.gov/index.cfm?adfg=bears.containers>), with the concurrence of the Superintendent;
- Items or methods approved by the Superintendent.

(2) Throughout the park, all food (except legally taken game) and beverages, food and beverage containers, garbage, harvested fish and equipment used to cook or store food must be stored in a bear resistant container (BRC) or secured—

- Within a hard sided building;
- Within lockable and hard sided section of a vehicle, vessel, or aircraft; or
- By caching a minimum of 100 feet from camp and suspending at least 10 feet above the ground and 4 feet horizontally from a post, tree trunk or other object on a line or branch that will not support a bear's weight.
- The Superintendent may, upon request, waive or modify food storage requirements in circumstances where compliance with these requirements is not possible, overly burdensome, and is not inconsistent with public safety and wildlife conservation interests.

Note: This provision does not apply to:

- Clean dishes and cooking equipment that are free of food odors. We strongly recommend that these items be securely stored; but clean and odor free items are not required to be stored in secure containers.
- Food that is being transported, consumed or prepared for consumption.
- The use of bait for trapping and hunting under the provisions of state and federal law.
- Food carried by persons climbing or traveling above the firm line on snow covered

terrain.

The intent of these designations is to prevent bears and other wildlife from obtaining and becoming conditioned to food and garbage, thus protecting wildlife and park visitors alike. We strongly recommend that dishes and cooking equipment be securely stored; but clean and odor free items are not required to be stored in secure containers. Ice chests and coolers, tents, dry bags or stuff sacks, plastic packing boxes (Totes, Action Packers, etc) and unmodified kayaks are not approved as BRC. The park offers, at no charge, bear resistant containers for temporary use to the public. A refundable deposit is required, and the containers can be obtained at the park's visitor center in Copper Center, AK.

2.11 Picnicking: designated areas

Superseded by 13.26.

2.13(a)(1) Fires: designated areas and conditions

Campfires and picnic fires are authorized in all areas of the park and preserve except the Headquarters/Visitor Center Developed Area and the mill site within the Kennecott National Historic Landmark. See 13.1904-13.1906. Where fires are permitted, all trash (tin foil, burn food, glass, and cans) must be removed from the fire site after use.

2.14(a)(2) Sanitation and refuse: conditions using government receptacles

No conditions established at present. Dumping commercial, household, or industrial refuse, brought in from private or municipal property, in government receptacles is prohibited.

2.14(a)(5) Sanitation: designated areas for bathing and washing

No designated areas. Unless otherwise allowed by the Superintendent, bathing and washing of cooking utensils, food and other property at all public water outlets, fixtures, or pools is prohibited.

2.14(a)(7) Sanitation: designated areas for disposal of fish remains

There are no designated areas.

Fish remains may not be disposed of on either land or water within 200 feet of public boat docks or designated swimming beaches, or within developed areas for reasons of public health and safety.

2.14(a)(9) Sanitation: designated areas for disposal of human waste in undeveloped areas

There are no designated areas or methods.

Disposing of human body waste within 100 feet of a water source, high water mark of a body of water, or a campsite, or within sight of a trail is prohibited.

2.14(b) Sanitation: conditions concerning disposal, carrying out of human waste

No special conditions have been established.

2.15(a)(1) Areas designated as closed to pets

No designated areas. Pets must be leashed or physically restrained at all times.

2.15(a)(3) Conditions for leaving pets unattended and tied to an object

No conditions at present.

Leaving pets unattended and tied to an object is prohibited.

2.15(a)(5) Pet excrement disposal conditions

No conditions at present.

2.15(b) Conditions for using dogs in support of hunting activities

No conditions at present.

2.16 (a)-(c) Horses and pack animals

Superseded by 43 CFR 36.11(e).

Access for subsistence purposes under 36 CFR 13.460(a) supersedes this section.

2.17(a)(1) Aircraft operation

Superseded by 43 CFR 36.11(f)(1).

Use of aircraft in national parks or monuments for subsistence purposes is prohibited under 36 CFR 13.450, except in Malaspina Forelands. See section 13.1902(c) of this document.

2.17(a)(2) Aircraft operation near docks, piers, swimming beaches and other designated areas

No areas prohibited.

2.17(c)(1) Conditions for removing downed aircraft

Superseded by 43 CFR 36.11(f)(3)(ii).

2.18(c) Snowmobiles: designated areas for use

No areas designated for snowmachine use.

Superseded in part by 43 CFR 36.11(c).

Superseded by 36 CFR 13.460 for subsistence uses.

2.19(a) Winter activities on roads and in parking areas: designated areas

This section only applies to designated roads and parking areas open to vehicular traffic.

This section is not applicable in Wrangell-St. Elias National Park and Preserve.

2.19(b) The towing of persons on skis, sleds, or other sliding devices by motor vehicle or snowmobile is prohibited, except in designated areas or routes

All areas of the park are open to towing.

2.20 Skating and skateboards

Superseded by 43 CFR 36.11(e).

2.21 Smoking

All park offices and visitor facilities are closed to smoking.

Smoking is prohibited within 100 feet of the park fuel and aviation gas storage facility.

These restrictions are intended to protect public safety from fire or explosion around fuel storage and dispensing facilities.

2.22 Property: leaving property unattended for longer than 24 hours

Superseded by 13.45.

2.35(a)(3)(i) Alcoholic beverages: areas designated as closed to consumption

No areas designated as closed.

2.38(b) Fireworks: permits, designated areas, and conditions

No areas designated for use of fireworks.

2.51 First Amendment Demonstrations

The following areas are designated for public assembly, meeting, gathering, demonstration, parade, or other public expression of views.

- Wrangell-St. Elias National Park/Preserve (WRST) Headquarters/Visitor Center complex. The designated location is the area under and adjacent to the bus shelter located on the south side of the visitor parking area. This is the only area designated by the superintendent for public assembly in the headquarters/visitor complex area.
- Outside the headquarters/visitor complex area, the remainder of the park and preserve are also open to assembly.

Demonstrations involving twenty-six or more individuals must have a permit issued by the superintendent.

2.52 Designated areas for sale and distribution of printed matter for First Amendment purposes

- All areas of the park and preserve are open to distribution or sale of printed matter. Printed matter is limited to message-bearing textual printed material such as books, pamphlets, magazines, and leaflets, provided that it is not solely commercial advertising.
- Sale or distribution activity by 26 or more individuals is prohibited without a permit issued by the superintendent.

2.60(a)(3) Designated areas for grazing

Grazing of pack or saddle animals by private parties, not to exceed 14 days, is authorized without a permit within the Park and Preserve. Any feed brought in must conform to the Alaska Weed Free Forage Certification Program. For more information on this certification, contact your local Soil & Water Conservation District. The Kenny Lake Soil & Water Conservation District office phone number is 822-4479.

Grazing in support of commercial operations is only allowed under permit from the superintendent.

These restrictions seek to lessen the impact of extended camps on vegetation.

2.62(b) Memorialization: designation of areas for scattering ashes

All areas are open to scattering of ashes without a permit.

PART 3. BOATING AND WATER USE ACTIVITIES

3.3 Permits

No permits required at present.

3.7 Personal Flotation Devices: designated times and/or activities

No designated times or activities. PFDs must be worn in accordance with 33 CFR part 175.

3.8(a)(2) Boating, prohibited operations: designated launching areas

All areas are open to launching of boats.

3.8(a)(4) Operating a vessel in excess of designated length, width, or horsepower

No designations at present.

3.8(b)(3) Operating a vessel in excess of flat wake speed in designated areas

No designated areas.

3.12(a) Water skiing: designated waters

No areas designated open.

3.14(a) Conditions for removing sunken, grounded, or disabled vessels

A permit is required from the Superintendent before sunken, grounded, or disabled vessels may be removed from waters within NPS administered areas except when the operator is able to remove or repair the vessel on site safely and without potential for damage to resources.

This requirement allows the Superintendent to establish terms and conditions for salvage operations as necessary to protect resources and provide for public safety.

3.16 Swimming and wading: areas designated as closed

All areas are open to swimming and wading.

3.17(a) Designated swimming areas and beaches

No designated areas.

3.17(c) Use or possession of flotation devices, glass containers, kites, or incompatible activities in swimming areas or beaches

No restrictions at present.

3.18(a) SCUBA and underwater diving: closures and restrictions

No closures or restrictions at present.

PART 4. VEHICLES AND TRAFFIC SAFETY

4.10 Routes or areas designated for off-road motor vehicle use in Preserves

See also 13.40(c) regarding the Malaspina Glacier Forelands, 13.460 for subsistence access, and 43 CFR 36.11(g) for recreational access

This restriction minimizes the impacts of vehicle travel while allowing for access.

4.11(a) Load weight and size limits: permit requirements and restrictive conditions

No restrictions at present.

4.21(b)-(c) Speed limits: designation of a different speed limit

No designations necessary at present.

4.30(a) Routes designated as open to bicycles

Superseded by 43 CFR 36.11(e).

4.30(d)(1) Wilderness closed to bicycle use

Superseded by 43 CFR 36.11(e).

4.31 Hitchhiking: designated areas

All areas are open to hitchhiking.

PART 5. COMMERCIAL AND PRIVATE OPERATIONS

5.7 Construction of buildings, roads, trails, airstrips, or other facilities

Maintenance of established landing strips utilizing non-motorized hand tools is not considered construction or repair and no permit is required.

PART 13. ALASKA REGULATIONS

13.25(a) Temporary closures and restrictions to camping

Donoho Basin

As used in this section, Donoho Basin is defined as the deglaciaded land found between the Kennicott and Root glaciers south of an east to west line that crosses Donoho Peak. This line is the dividing line between park and preserve and designated wilderness and non-wilderness. A map depicting the boundaries of Donoho Basin is attached.

As used in reference to Donoho Basin, guided groups are all parties operating under a commercial use authorization from the NPS.

As used in reference to Donoho Basin, unguided groups are all parties not operating under a commercial use authorization from the NPS.

As used in reference to Donoho Basin, associated groups are those lead by the 1) same company, 2) partnering companies, or 3) partnering organizations.

- From May 15 through September 15, unguided groups may not exceed 12 individuals at Donoho Basin.
- From May 15 through September 15, the minimum camp distance between associated groups in Donoho Basin is ½ mile.
- From May 15 through September 15, all groups (guided or unguided) of 8 or more individuals must register to camp at Donoho Basin. Registration can be done online, over the telephone, or in person at the NPS visitor center.

See attached determination of need.

Camping is restricted at and adjacent to the information kiosk and spur road on the north side of the McCarthy Road at mile 59. Camping is prohibited from April 15 through October 15.

The restriction is necessary because of the danger presented to the camping public by human habituated bears. The campground is located in a bear corridor and adjacent to a large soap berry patch. Bear research has confirmed that bear encounters are unavoidable and that the bears tend to be accustomed to humans and to associate humans' with food. The risk to campers from both black and brown bears is unacceptably high. Private fee campgrounds are available in the immediate area.

13.25(b) Site time limits: authorization to exceed 14 day limit at one location

No general exceptions at present.

13.25(c) Designated campgrounds: restrictions, terms, and conditions

The Kendesnii Campground is the only designated campground in the park/preserve.

Discharging a firearm May 1 through September 30 in the Kendesnii Campground is prohibited unless required for defense of life and property.

As used in this section, Kendesnii Campground is defined as the designated land beginning at approximately mile 28.3 on Nabesna Road, following an eastern direction

on the Nabesna Road to mile 28.5 (at private property boundary), then south approximately 1000 feet (along private property boundary), then west 600 feet to Twin Lake and following north along the shoreline of lake, extending north from the Peninsula of the lake -at the edge of the campground, north to Nabesna Road at mile 28.3. The total acreage for Kendesnii Campground is at approximately 19 acres. Campground entrance from Nabesna Road located at N 62°31'49.37" W 143° 15' 29.47" (DMS NAD83 Alaska Albers). This area defined is within the park. A map depicting the boundaries of Kendesnii Campground is attached.

See also 13.1904(d), 13.1906(b).

13.26 Picnicking-areas where prohibited or otherwise restricted

No restrictions at present.

13.30(b) Temporary closures or restrictions to carrying, possessing, or using firearms

There are no additional restrictions.

13.35(d) Collection of dead standing wood: areas designated as open and conditions for collection

No designated areas at present.

13.35(f)(1) Natural features: size and quantity restrictions for collection

No restrictions at present.

13.35(f)(2) Natural features: closures or restrictions due to adverse impacts

No closures or restrictions at present.

13.40(c) Restrictions on activities related to commercial fishing rights or privileges

No restrictions at present.

13.40(e) Temporary closures or restrictions to the taking of fish and wildlife

No closures at present. See applicable State of Alaska hunting regulations. Sport hunting is prohibited in Wrangell-St. Elias National Park. See 50 CFR 100.26 for applicable subsistence hunting regulations.

13.45(b)(1)-(6) Exceptions to unattended or abandoned property

Superintendent authorizations for exceptions for unattended or abandoned property are made on a case by case basis. Contact park headquarters for more information.

13.45(c) Designated areas where personal property may not be left unattended for any time period, limits on amounts and types, manner in which property is stored

No designated areas.

13.50(h) Facility closure and restrictions

No restrictions at present.

13.122 Established conditions for removal of cabin for which a cabin permit has been denied, expired, or revoked

No conditions established at present (may require access permit).

13.160 Designated existing cabins, shelters or temporary facilities that may be shared for subsistence uses without a permit

No designations at present.

13.166 Established conditions and standards governing the use and construction of temporary structures and facilities for subsistence purposes, published annually

No conditions or standards established at present.

13.170 Designated cabins or other structures for general public use

- Esker Stream: Reservations are needed for Esker Stream Cabin. Reservations may be made in advance year round through the Yakutat Ranger Station (907) 784-3295.
- Glacier Creek: Reservations are needed (April 1 – Sept 30) for Glacier Creek Cabin. Reservation may be made in advance through the Copper Center Visitor Center (907) 822-7250.
- Nuggett Creek: Reservations are needed (April 1 – Sept 30) for Nuggett Creek Cabin. Reservations may be made in advance through the Copper Center Visitor Center (907) 822-7250.
- Caribou Creek Cabin: Reservations are needed for Caribou Creek Cabin. Reservations may be made in advance year round through the Slana Ranger Station (907) 822-5238.
- Viking Lodge: Reservations are needed for Viking Lodge Cabin. Reservations may be made in advance year round through the Slana Ranger Station (907) 822-5238.

All other cabins, not otherwise under NPS permit, are open for short-term public use.

- May Creek
- Jakes Bar
- Peavine 1
- Peavine 2
- Orange Hill
- Too Much Johnson
- Solo Mountain
- Chelle Lake
- Huberts Landing

Use of any combination of cabins shall not exceed seven days in a 30-day period without a permit from the Superintendent.

A reservation system for Glacier Creek, Nuggett Creek, Caribou Creek, and Esker Stream Public Use Cabins and a seven day public use limit within a 30 day period without a permit will provide for more equitable allocation and use of facilities, and for avoidance of conflict among visitor use activities.

13.172 Established conditions and allocation system to manage the use of designated public use cabins

Other than Viking Lodge, Esker Stream, Caribou Creek, Nuggett Creek, and Glacier Creek cabins, cabins listed may be occupied on a first come, first serve basis.

13.188(b) Established conditions for removal of temporary facility used in excess of 14 days

Individuals must remove facility, all personal property, and return the site to its natural condition.

These conditions are intended to protect the park from impacts to vegetation and soil and to ensure that personal items are not left in the park.

13.460 Closures or restrictions to the use of snowmobiles, motorboats, dog teams, and other means of surface transportation traditionally employed by local rural residents engaged in subsistence uses

a. The following three routes are closed to the use of off road vehicles (ORVs). The closures are centered on the three trails described and extend 1,000 feet to either side of each trail.

- Trail #1 has end points on the south side of The Sportsmen's Paradise Lodge property and northeast end of Jack Lake.
- Trail #2 has end points on the Jack Lake road and the Tanada Lake trail, and, from that intersection of the Tanada lake trail along an eastern parallel route of the main trail to a second intersection further south on the Tanada Lake trail.
- Trail #3 has end points on the Tanada Lake trail and the Copper Lake trail.

This closure is a seasonal closure in effect only during summer months. During winter periods in which there is 6-12 inches of snow or more, or a combination of snow and frost depth sufficient to protect the underlying vegetation and soil, these areas will be open to over snow vehicles. This closure will be in effect until a determination by the Superintendent concludes that these routes no longer represent an unacceptable adverse impact on the resource.

The Superintendent has determined that Trails #1, #2, and #3 are causing an unacceptable adverse impact on the resource. A map depicting these trails may be viewed on the park's web site or a physical copy can be obtained from the Superintendent upon request. This closure will be in effect until a determination by the Superintendent concludes that these routes no longer represent an unacceptable adverse impact on the resource.

b. The following area is closed to the use of off road vehicles (ORVs): all portions of Wrangell-St. Elias National Park and Preserve south of the Bagley Ice Field and Seward Glacier, extending east to the western margin of the Hubbard Glacier.

This closure would be a seasonal closure in effect only during summer months. During winter periods in which there is 6-12 inches of snow or more, or a combination of snow and frost depth sufficient to protect underlying vegetation and soil, these areas will be open to over snow

vehicles. This closure would be in effect until a determination by the Superintendent concludes that ORV use in this area no longer represents an unacceptable adverse impact on the resource.

See also 36 CFR 2.16, 2.17, 2.18, 3.6, 4.10, 4.30, 13.40(c) and 43 CFR 36.11(c)-(e).

13.485(a)(1) Permit specifications for harvesting standing timber greater than 3" diameter for subsistence purposes (house logs & firewood)

See policy statement on subsistence green wood harvest.

13.485(a)(2) Restrictions on cutting of timber less than 3" in diameter for subsistence purposes

No restrictions at present.

WRANGELL-ST. ELIAS SPECIAL REGULATIONS

13.1902(b) Aircraft access for residents of Yakutat to Malaspina Forelands

For the purposes of this exemption only, the Malaspina Forelands Area is defined as all portions of Wrangell-St. Elias National Park and Preserve south of the Bagley Ice Field and Seward Glacier, extending east to the western margin of the Hubbard Glacier.

These areas are available for aircraft access under a permit issued by the Superintendent for residents of Yakutat that are Federally qualified for subsistence in Wrangell-St. Elias National Park and Preserve.

13.1910 Kennecott Mines National Historic Landmark and developed areas: closures and restrictions

Discharging a firearm on federal lands from May 1 through September 30 within the mill site as defined in 13.1904(d) is prohibited unless required for defense of life or property.

43 CFR, PART 36 TRANSPORTATION AND UTILITY SYSTEMS (Access Regulations)

36.11(c) Temporary closures to the use of snowmachines for traditional activities

No closures at present.

See also 2.18.

36.11(d) Temporary closures to the use of motorboats

No closures at present.

See also 3.3, 3.6.

36.11(e) Temporary closures to the use of non-motorized surface transportation

No closures at present.

See also 2.16, 3.3, 3.6.

36.11(f)(1) Temporary closures to landing fixed-wing aircraft

No closures at present.

36.11(f)(3)(ii) Established procedure for salvaging and removing downed aircraft

A permit is required from the Superintendent before downed aircraft may be salvaged and removed from the park; violation of the terms and conditions of the permit is prohibited.

This requirement allows the Superintendent to establish terms and conditions for salvage operations as necessary to protect resources, provide for public safety, and minimize impacts on visitors.

36.11(g)(2) Use of off-road vehicles (ORV) on existing trails

ORVs may be operated on existing trails pursuant to a permit issued under 43 CFR 36.11(g)(2). Existing trails where ORVs may be operated are shown on a map available at park headquarters in Copper Center or the Slana Ranger Station. Pneumatic tired vehicles and tracked vehicles are authorized. Recreational ORVs may not be operated in designated wilderness. These designations and restrictions do not apply to subsistence use of ORVs traditionally used for subsistence activities.

This restriction will minimize the impacts of vehicle travel in the park while allowing for access.

Determination of Need for a Restriction, Condition, Public Use Limit, or Closure

Subject: Food Storage

Pursuant to Title 36 of the Code of Federal Regulations, 1.5 (c) and 2.10 (d), the Superintendent of Wrangell-Elias National Park and Preserve has determined that in order to protect public safety and prevent adverse impacts to wildlife, conditions are placed on storage of food, garbage, harvested fish, and equipment used to cook or store food throughout the park.

The reasons for this restriction are as follows:

1. Wildlife in a natural ecosystem are adapted to subsist on natural foods. Obtaining human food may adversely affect behavior of individuals and the health of wildlife populations. Because natural processes are expected within NPS areas, wildlife should not obtain food from people.
2. Both black and brown bears are common throughout parklands and are readily attracted to even small quantities of human food. They are very curious and intelligent, and will commonly open or enter containers, tents, and structures.
3. Bears are extremely susceptible to conditioning to human food sources. Once they have learned to associate a site or item (e.g. tent, kayak, boat, etc.) with acquisition of food, they may return to that source repeatedly for further food rewards.
4. It does not matter whether the material is fresh, dry, powdered, canned, etc. Once a curious bear has obtained a positive food reward, it will return and / or continue to seek out further rewards in similar situations.
5. Due to the transfer of knowledge from sows to cubs and the long life span of individual bears, young bears exposed to human foods may display unnatural and unacceptable behavior for decades.
6. Bears which become conditioned to human food are likely to be killed by humans in defense of life or property inside the parklands or on adjacent lands.
7. Humans are at risk of injury or death when bears attempt to obtain food from tents, packs, vessels, or other similar areas.

The reasons less restrictive measures will not be effective are as follows:

1. Educational efforts regarding proper food storage and disposal of food and garbage have been undertaken by state and federal agencies in Alaska and in other western states for many years. These efforts have undoubtedly reduced food conditioning and wildlife/human conflicts.
2. Recognizing that variations in the environment and recreational activities require multiple food storage options, NPS managers have undertaken the following to assist visitors and make these conditions less onerous by making bear resistant containers (BRCs) available at NPS headquarters and field locations.
3. Despite these efforts, NPS managers repeatedly encounter situations in which food or garbage is improperly stored throughout the parklands.
4. The food storage conditions under this section allow for a wide variety of storage options, including free loans of portable BRC units, to make compliance less onerous.

5. We have considered the use of the State of Alaska regulations which prohibit intentionally or negligently feeding wildlife or leaving human food, pet food, or garbage in a manner that attracts wildlife. While NPS officers cannot enforce this state regulation directly, the NPS considered this language for the compendium. Given the NPS mandate to protect wildlife, the NPS prefers a proactive approach designed to prevent wildlife from obtaining food from humans, intentionally or unintentionally.
6. Given the lack of complete compliance with educational efforts, the flexibility in compliance options, and the effort made by park managers to provide free equipment to promote compliance, these conditions are the least restrictive required to fulfill the parklands mission of protecting wildlife and human safety.

Determination of Need for a Restriction, Condition, Public Use Limit, or Closure

Subject: Conditions for removing sunken, grounded, or disabled vessels

Pursuant to Title 36 of the Code of Federal Regulations, 1.5(c) and 3.14(a), the Superintendent of Wrangell-St. Elias National Park and Preserve is requiring a permit before sunken, grounded, or disabled vessels may be removed from the preserve if the operator is unable to do so without risking damage to resources or endangering public safety.

The reasons for this restriction are as follows:

- This requirement allows the Superintendent to establish terms and conditions for salvage operations as necessary to protect resources, provide for public safety, and minimize impacts on visitors.

The reasons less restrictive measures will not be effective are as follows:

- How to protect resources, public safety, and minimize visitor impact when removing a disabled vessel needs to be addressed on a case by case basis since the circumstances involved in each incident is unique. A permit allows the NPS and the boater maximum flexibility to address the specific circumstances at hand when removing disabled, grounded or sunken vessels.

Determination of Need for a Restriction, Condition, Public Use Limit, or Closure

Subject: Firearms discharge

Pursuant to Title 36 of the Code of Federal Regulations, 1.5 (c) and 13.1910, the Superintendent of Wrangell-Elias National Park and Preserve has determined that in order to protect public safety, discharging a firearm on federal lands within the mill site in KNHL during peak visitor season is prohibited.

The reasons for this restriction are as follows:

After review and consideration of the need for annual updates, the park is proposing one change relating to public safety.

13.73(e) Kennecott Mines National Historic Landmark and developed areas: closures and restrictions

Discharging a firearm on federal lands from May 1 through September 30 within the mill site as defined in 13.1907(d) is prohibited unless required for defense of life or property.

The reasons for this restriction are as follows:

- Due to the increasing visitation numbers, the proximity of the Kennicott Glacier Lodge and other highly frequented visitor facilities, and the nature of the park reconstruction efforts at Kennecott, discharging firearms poses a serious public safety concern.

The reasons less restrictive measures will not be effective are as follows:

- The community of Kennecott is unincorporated and has no local formal government that could address the unsafe discharge of firearms within the concentrated visitor use of the Mill Site.
- Although State law prohibits hunters from shooting from or across roadways, the roadways within Kennecott are small, and the nature of use in the area would continue to place people at risk. Visitors, local residents, local workers, and NPS staff conduct most of their activities in and around the buildings and structures of the area, and not on roadways.
- The restriction will only be in place on federal lands in the mill site and only during summer months. During this time, there are higher concentrations of visitors, summer residents, and employees in this particular area which elevates safety concerns over the discharge firearms in this area.
- Any subsistence hunting activity that does not require the discharge of a firearm within this limited area would not be affected by this proposed restriction.

Determination of Need for a Restriction, Condition, Public Use Limit, or Closure

Subject: Temporary closures and restrictions to camping at Donoho Basin

Pursuant to Title 36 of the Code of Federal Regulations, 13.25, the Superintendent of Wrangell-St. Elias National Park and Preserve is adopting restrictions on camping at Donoho Basin.

13.25(a) Temporary closures and restrictions to camping

Donoho Basin

As used in this section, Donoho Basin is defined as the deglaciaded land found between the Kennicott and Root glaciers south of an east to west line that crosses Donoho Peak. This line is the dividing line between park and preserve and designated wilderness and non-wilderness. A map depicting the boundaries of Donoho Basin is attached.

As used in reference to Donoho Basin, guided groups are all parties operating under a commercial use authorization from the NPS.

As used in reference to Donoho Basin, unguided groups are all parties not operating under a commercial use authorization from the NPS.

As used in reference to Donoho Basin, associated groups are those lead by the 1) same company, 2) partnering companies, or 3) partnering organizations.

- From May 15 through September 15, unguided groups may not exceed 12 individuals at Donoho Basin.
- From May 15 through September 15, the minimum camp distance between associated groups in Donoho Basin is ½ mile.
- From May 15 through September 15, all groups (guided or unguided) of 8 or more individuals must register to camp at Donoho Basin. Registration can be done online, over the telephone, or in person at the NPS visitor center.

The reasons for this restriction are as follows:

1. In recent years, the Donoho Basin has been subjected to several emergency camping closures in response to bear/human conflicts. In 2008, a bear that had obtained food from campers in Donoho Basin had to be destroyed.
1. During 2009, park managers engaged local residents who use Donoho Basin recreationally and as commercial operators. Several local stakeholder meetings were held during the summer of 2009 to help park managers identify issues and solutions. The discussions illustrated that concerns about the Donoho Basin went beyond prevention of bear/human conflicts, including impacts to Donoho Basin's natural resources, improving visitor experience and enhancing visitor safety.
2. Donoho Basin is a popular destination in Wrangell-St. Elias National Park and Preserve that campers can access by foot from Kennecott.
3. The number of available campsites for larger groups at Donoho Basin is limited.

4. The level and type of use as well as limited number of campsites at Donoho Basin would benefit from more active management to reduce user conflicts and prevent food storage problems.
5. Commercially guided groups are currently subject to group size limits and all parties are subject to food storage restrictions under 36 CFR 2.10(d).
6. In addition to limits on the number of individuals that can be in a group, the park is proposing to adopt a minimum distance of ½ mile between groups to minimize crowding, enhance visitors' experience, and reduce the number of connecting social trails between campsites.
7. Registration is proposed for all groups of 8 or more for two reasons: 1) the information that a group has registered will be available to other groups to assist them in avoiding other campers in the Donoho Basin, and 2) the contact with park staff enables the park to provide food storage containers (if the group does not already have one) and information relating to food storage, safety, park regulations, and recommended Leave No Trace camping techniques. Registration can be done online, in person, or over the telephone beginning in May.
8. These conditions are intended to be interim measures. Park managers intend to engage stakeholders following the 2010 season to discuss how these interim measures worked toward achieving park objectives and impacts to users. These compendium provisions may be adjusted accordingly. As needed, long-term management of the Donoho Basin may also be addressed in the upcoming Frontcountry Management Plan.

The reasons less restrictive measures will not be effective are as follows:

1. Until 2009, Wrangell-St. Elias National Park and Preserve was one of the few Alaska national parks that did not have group size limits for guided hiking/camping groups. This resulted in many of the larger groups coming to Wrangell-St. Elias National Park and Preserve and specifically to Donoho Basin due to its relative accessibility. Additionally, due to its relative accessibility, larger groups have frequented Donoho Basin, which has resulted in impacts to the resource and user conflicts. To address these concerns, the park adopted a group size limit for commercially guided groups in 2009, but did not adopt limits for private groups. The NPS has determined that the concerns presented by large groups are not limited to commercial operators, but also exist for large private groups.
2. The NPS has also determined that all groups of 8 or more need to register to camp in Donoho Basin. Registration will allow these groups to get "face time" with park staff before heading up the trail. During this encounter, park staff can share information regarding larger parties already camping in Donoho Basin, food storage, leave no trace techniques, bear/human conflict avoidance, and safety as well as provide food storage containers if necessary. Contact in the field alone does not provide the same opportunity for trip planning (to avoid overcrowding) and avoidance of problems related to food storage, safety, and impact to resources.
3. The NPS has determined that ½ mile separation between larger groups will protect visitors' experiences and minimize resource impacts. This distance will prevent monopolization of limited camp locations and minimize development of social trails between associated camps.

Determination of Need for a Restriction, Condition, Public Use Limit, or Closure

Subject: Quantity restriction for collection of mushrooms

Pursuant to Title 36 of the Code of Federal Regulations, 13.35, the Superintendent of Wrangell-St. Elias National Park and Preserve is adopting limits on the amount of mushrooms that may be removed from the park.

13.35(f)(1) Natural features: size and quantity restrictions for collection

The collection or gathering of mushrooms for personal use is limited to two 5-gallon containers of whole, fresh mushrooms per person, per day.

The reason for the restriction is as follows:

1. In summer 2009, the Chakina fire burned approximately 60,000 acres south of McCarthy and Kennecott across the Chitina River. Because mushrooms flourish in environments recently burned and the substantial size of this fire, interest in harvesting mushrooms has increased significantly.
2. Limits on the quantities of mushrooms gathered are intended to help establish an enforceable approach to prevent collection for commercial purposes.
3. The whole, fresh wording restricts persons from cutting and drying mushrooms, thus increasing the actual number of mushrooms available for harvest by other individuals for personal use.
4. The proposed restriction is consistent with Alaska State Parks and Bureau of Land Management harvest limits.

The reason less restrictive measures will not be effective are:

1. Absence of a quantity limit at a time when valuable mushrooms are expected to be abundant across a large area would facilitate illegal commercial mushroom harvest, potentially impacting park resources, subsistence uses, and collection for personal use.

Determination of Need for a Restriction, Condition, Public Use Limit, or Closure

Subject: Access to Caves

Pursuant to Title 36 of the Code of Federal Regulations, 1.5, the Superintendent of Wrangell-St. Elias National Park and Preserve is adopting conditions on entry to caves.

In order to prevent spreading White-Nose Syndrome (WNS) to bats, any person entering a cave or any part or passage of any cave, except glacier ice caves, shall

1. Ensure all gear, equipment, and clothing are not contaminated with the fungus associated with WNS by either
 - a). Utilizing only gear, equipment, and clothing that has not been used to enter caves outside of Wrangell-St. Elias National Park and Preserve (WRST), **or**
 - b). utilizing only gear, equipment, and clothing that has been entirely disinfected in accordance with the latest approved protocols which are found at <http://www.fws.gov/WhiteNoseSyndrome/caves.html>. These procedures are also available at NPS visitor centers
2. Contact WRST headquarters at 907-822-5234 at least 72 hours prior to entering a cave.

The reasons for this proposed restriction are as follows:

- This restriction is part of a national interagency effort to limit the human-assisted spread of the fungus thought to cause WNS, a highly infectious disease that causes unprecedented mortality in several species of hibernating bats.
- WNS has killed more than a million bats in the Lower 48 and is threatening several endangered species of bats.
- WNS is actively spreading in North America, and has been documented in 14 states and the provinces of Ontario and Quebec, Canada. The potential for this apparently exotic disease to continue spreading to bat populations in northern latitudes is considered very high.
- Evidence suggests WNS is likely transmitted two ways.
 - a. **Bat-to-bat**– Bats often congregate in groups in the winter hibernacula and come in contact with each other, providing the opportunity for many individuals to be exposed to the fungus.
 - b. **Cave to Human to Bats** - Aspects of the geographic spread suggest that humans may transmit WNS from infected sites to clean sites. This kind of spread is most likely occurring from clothing and equipment that are not properly cleaned and decontaminated between sites. Scientists speculate the fungus is ingested by bats and then excreted in the bat's guano on the cave floor. The fungus can grow on many different organic materials, and appears to persist in caves year-round. Fungal spores, and/or other microscopic organisms, can easily become attached to a person's skin, hair, clothing and equipment, and it is possible that such elements could remain alive for weeks or months after leaving an underground environment. Because of the devastating effects of WNS, it is critical that people assume responsibility for combating the potential spread of WNS.

- While park managers do not have a detailed understanding of bat populations throughout the park, several factors increase the risk of infection at WRST. First, bats are found in many locations in WRST. Second, WRST has abundant cave resources, many of which have not yet been inventoried, where bats have been observed. Third, cave temperatures in WRST are ideal for WNS fungus to thrive if introduced. Fourth, it is believed there is substantial use of caves in WRST by a diverse group of cavers that also explore caves in lower 48 parks and overseas. The combination of these factors puts WRST at a high risk for human-assisted infection of WNS.
- This action will substantially reduce the risk of the human-assisted spread of WNS by ensuring equipment, gear, and clothing is not infected with the fungus *Geomyces destructans* believed to cause WNS. Preventing the transmission of this fungus to caves within WRST will meet our objective of protecting bat populations from WNS.

The reasons less restrictive measures will not be effective are as follows:

1. WNS is highly infectious disease that has a high mortality rate in bats. There are no treatment options for WNS infected bats at this time and isolating bat populations is also not possible. For these reasons, prevention of infection is essential to protect bat populations.
2. Educational efforts alone would not be effective because cavers, more than other visitors, do not tend to stop at visitor contact points or contact NPS staff. Further, some cavers may explore caves during winter months when visitor contact points operate on restricted hours and NPS staff levels are reduced. These factors create a situation where education and public contact are less effective.

Determination of Need for a Restriction, Condition, Public Use Limit, or Closure

Subject: Public Use Cabins

Pursuant to Title 36 of the Code of Federal Regulations, 13.172, the Superintendent of Wrangell-St. Elias National Park and Preserve is adopting a reservation system and conditions for use of public use cabins in the park.

13.172 Established conditions and allocation system to manage the use of designated public use cabins

A reservation system and seven-day public use limit are proposed for the Glacier Creek, Nuggett Creek, Caribou Creek, and Esker Stream Public Use Cabins to provide for more equitable allocation and use of facilities, and for avoidance of conflict among visitor use activities.

The reason for a reservation system and establishment of a seven day public use limit is as follows:

- An increase in visitor use numbers associated with certain public use cabins was identified.
- Visitors have monopolized certain cabins for long periods of time, not allowing for others' use of public use cabins.
- Visitation increases for some public use cabins during certain periods of the year, generally April 1 – Sept 30.
- Visitation is consistent year round for Viking Lodge, Caribou Creek, and Nuggett Creek cabins, due to accessibility by ATV, snow machine, and foot
- A reservation system will allow for better planning and avoidance of conflict among visitors.

The reason less restrictive measures will not be effective are as follows:

- Visitors will continue to monopolize higher-visited public use cabins and not allow for equitable allocation and use of facility during higher-visitation periods.
- Conflict among public use cabin users will continue if no allowance is made for reservations.

MEMORANDUM

To: Park Staff

From Superintendent, Wrangell-St. Elias NP/P

Subject: Subsistence Green Log Policy

The preamble to 36 CFR Part 13 dated June 17, 1981, states the following with regard to the subsistence use of timber and plant materials:

Section 13.49(a) relaxes the general public use regulations by allowing local rural residents in park areas where subsistence uses are allowed to obtain a permit to cut standing live timber of greater than three inches diameter at ground height for subsistence needs such as shelter or fuel. Before issuing a permit, the Superintendent must determine that the proposed cutting is compatible with the purposes for which the park area was established. Furthermore, the Superintendent will include in the permit any stipulations deemed necessary to protect the resources of the park area...

In order to implement this direction, a study of the forest resources in areas subject to timber cutting was initiated in 1986. This study concluded that in order to protect the continued viability of the slow—growth forests found within the park and preserve, limited harvesting of green logs could continue under certain conditions and would need to be closely monitored, in addition, the number of requests for green log permits has steadily increased since the establishment of the park. In order to deal with these requests in a rational and reasonable manner, the following policy and permits terms and conditions have been established:

POLICY:

It is the policy of the Superintendent, Wrangell-St. Elias National Park and Preserve to allow for the non-commercial cutting of green logs in accordance with the provisions of the Alaska Natural Lands Conservation Act (ANILCA) and Title 36 CFR, Part 13.49, "...the Superintendent may permit cutting in accordance with the specifications of a permit if such cutting is determined to be compatible with the purposes for which the park area was established." This policy covers the non-commercial cutting of live standing timber (green logs) for appropriate subsistence use, such as house logs or firewood greater than 3" at ground height.

Of primary concern to the National Park Service is the maintenance and protection of forest resources and other park values. Subsistence green log permits will only be issued if it can be shown that harvest will not impair or otherwise degrade the viability of the forest resource and other park values. Applicants for subsistence green log permits must meet the following conditions prior to issuance of a permit by the Park Superintendent.

STANDARD PERMIT PROCEDURES AND CONDITIONS:

For subsistence house log permits, the applicant must demonstrate a significant need for green logs, and may only be used for a primary place of residence.

Applicant generally must live within the park boundary and have demonstrated a customary and traditional use of park resources.

Applicant must provide evidence of exploring reasonable alternative sources for logs such as logs from state, private or university lands, or by transporting logs which are harvested outside the park, to the building site. The Superintendent will also consider the availability of suitable downed timber from both private and public lands in determining amount of green logs to be taken from park lands.

For subsistence house log permits, the applicant must submit a rough plan/sketch, dimensions and proposed method of construction to the Superintendent before permit is considered.

For subsistence house log permits, the allowable harvest shall not exceed 120 trees (includes both live and dead trees), the amount required for a cabin of 280 sq. ft. (determined on the basis of the average size of 237 cabins identified on park/preserve lands). This amount includes a 20% allowance for waste, unusable wood, tree size variability and miscellaneous needs.

For firewood permits, the applicant will be limited to what is reasonably needed for purposes of heating, cooking, etc. in the primary place of residence.

The Superintendent may further limit the amount of logs based on concerns for forest viability, limited annual production and potential impact on park values.

Subsistence house logs may only be used for a primary residence and may not be used for commercial purposes (sale of whole logs or sale of lumber cut from subsistence logs) or in structures used for commercial purposes (lodges, etc.).

Green logs granted for firewood use may be used only for that purpose and may not be used for house construction, saw timber or other uses unless specifically authorized on the permit.

All subsistence logs must be marked and measured by NPS staff prior to harvest.

The Superintendent will designate access routes to be used for harvesting and skidding subsistence green logs.

Subsistence green logs may not be harvested farther than one half mile from a designated access route.

Timber felling and skidding will be limited by ground conditions and season to protect resource values and is generally limited to frozen ground with a minimum of 6-12" of snow cover.

An additional subsistence house log permit will not be issued to a landowner/family for a period of 10 years after the previous permit was issued. This condition applies to any land subdivided or transferred subsequent to the issuance of the original subsistence house log permit.

An additional subsistence house log permit may be issued due to emergency or unusual and unforeseen circumstances (fire, other damage, etc.).

Subsistence firewood permits may be issued on a yearly basis.

Permits may not be issued in zones or areas where subsistence timber harvest would result in a threat to the viability of the forest resource or which would otherwise compromise the purposes for which the park was established.

Environmental, archeological, historical, and subsistence compliance may be required prior to issuance of subsistence log permit.

The Special Use Permit (10-114) shall be the permitting instrument and shall be completed in accordance with NPS-53.

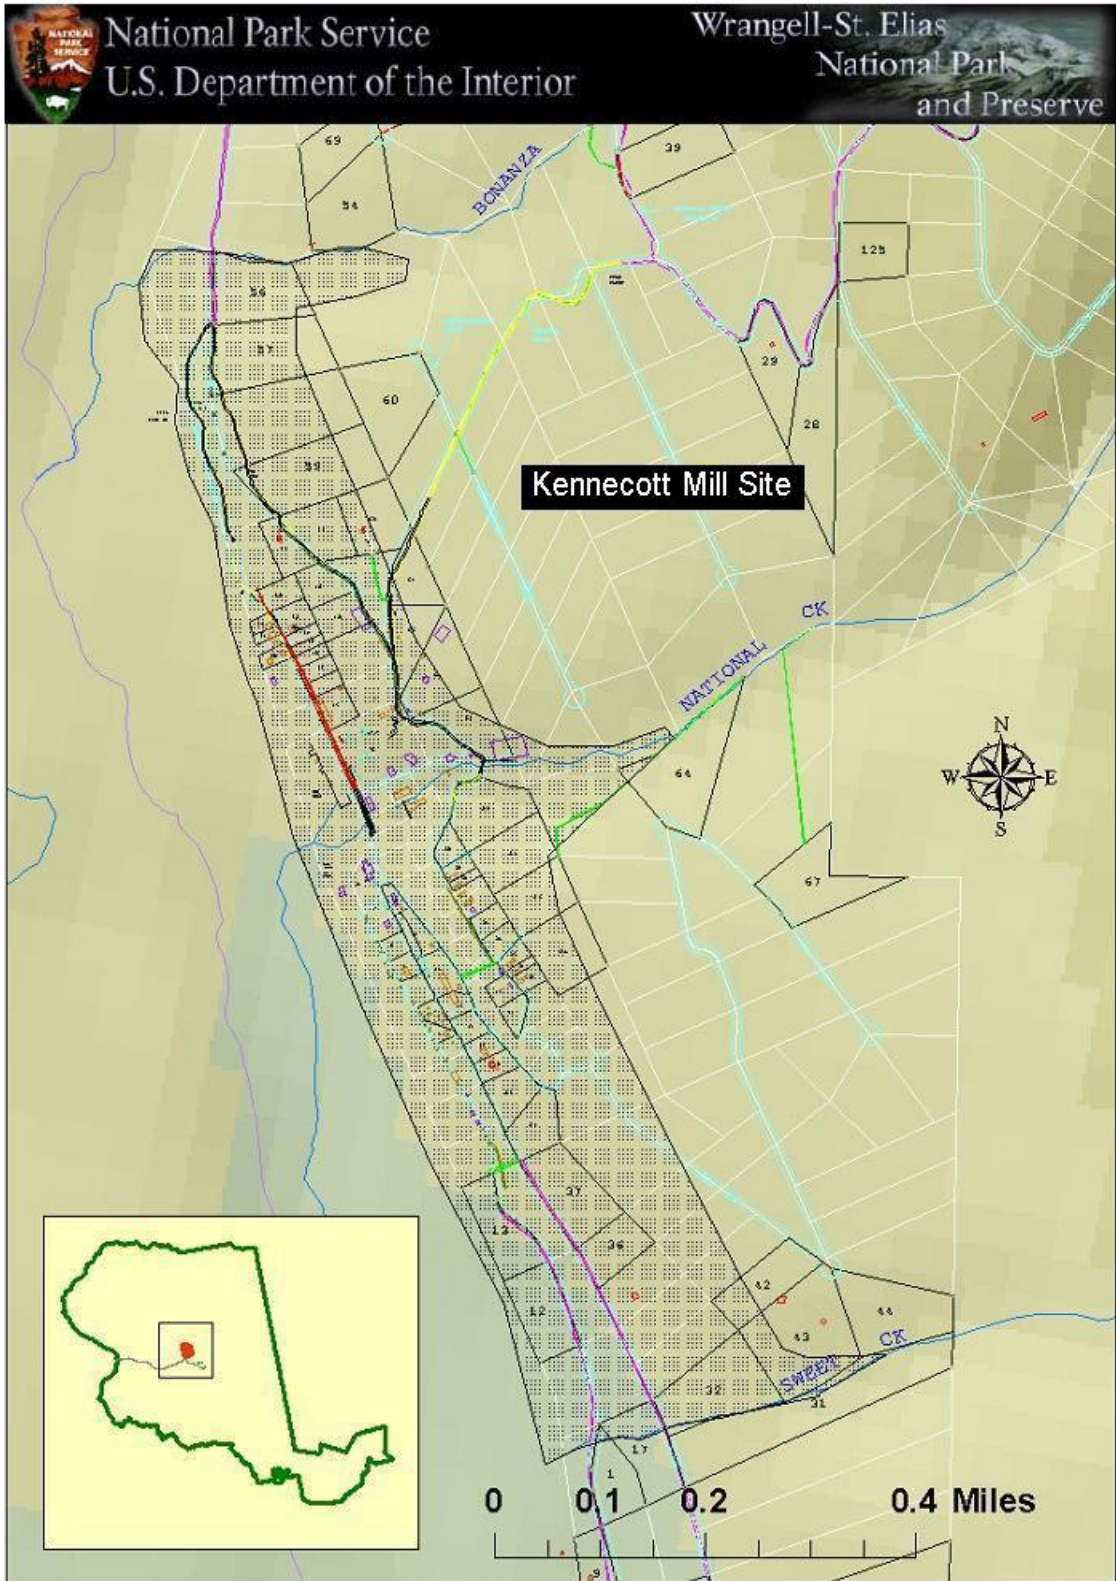

Violation of the terms and conditions of the permit may result in an immediate revocation of the permit by the Superintendent.

Subsistence green log permits may only be issued by the Superintendent or his designee.

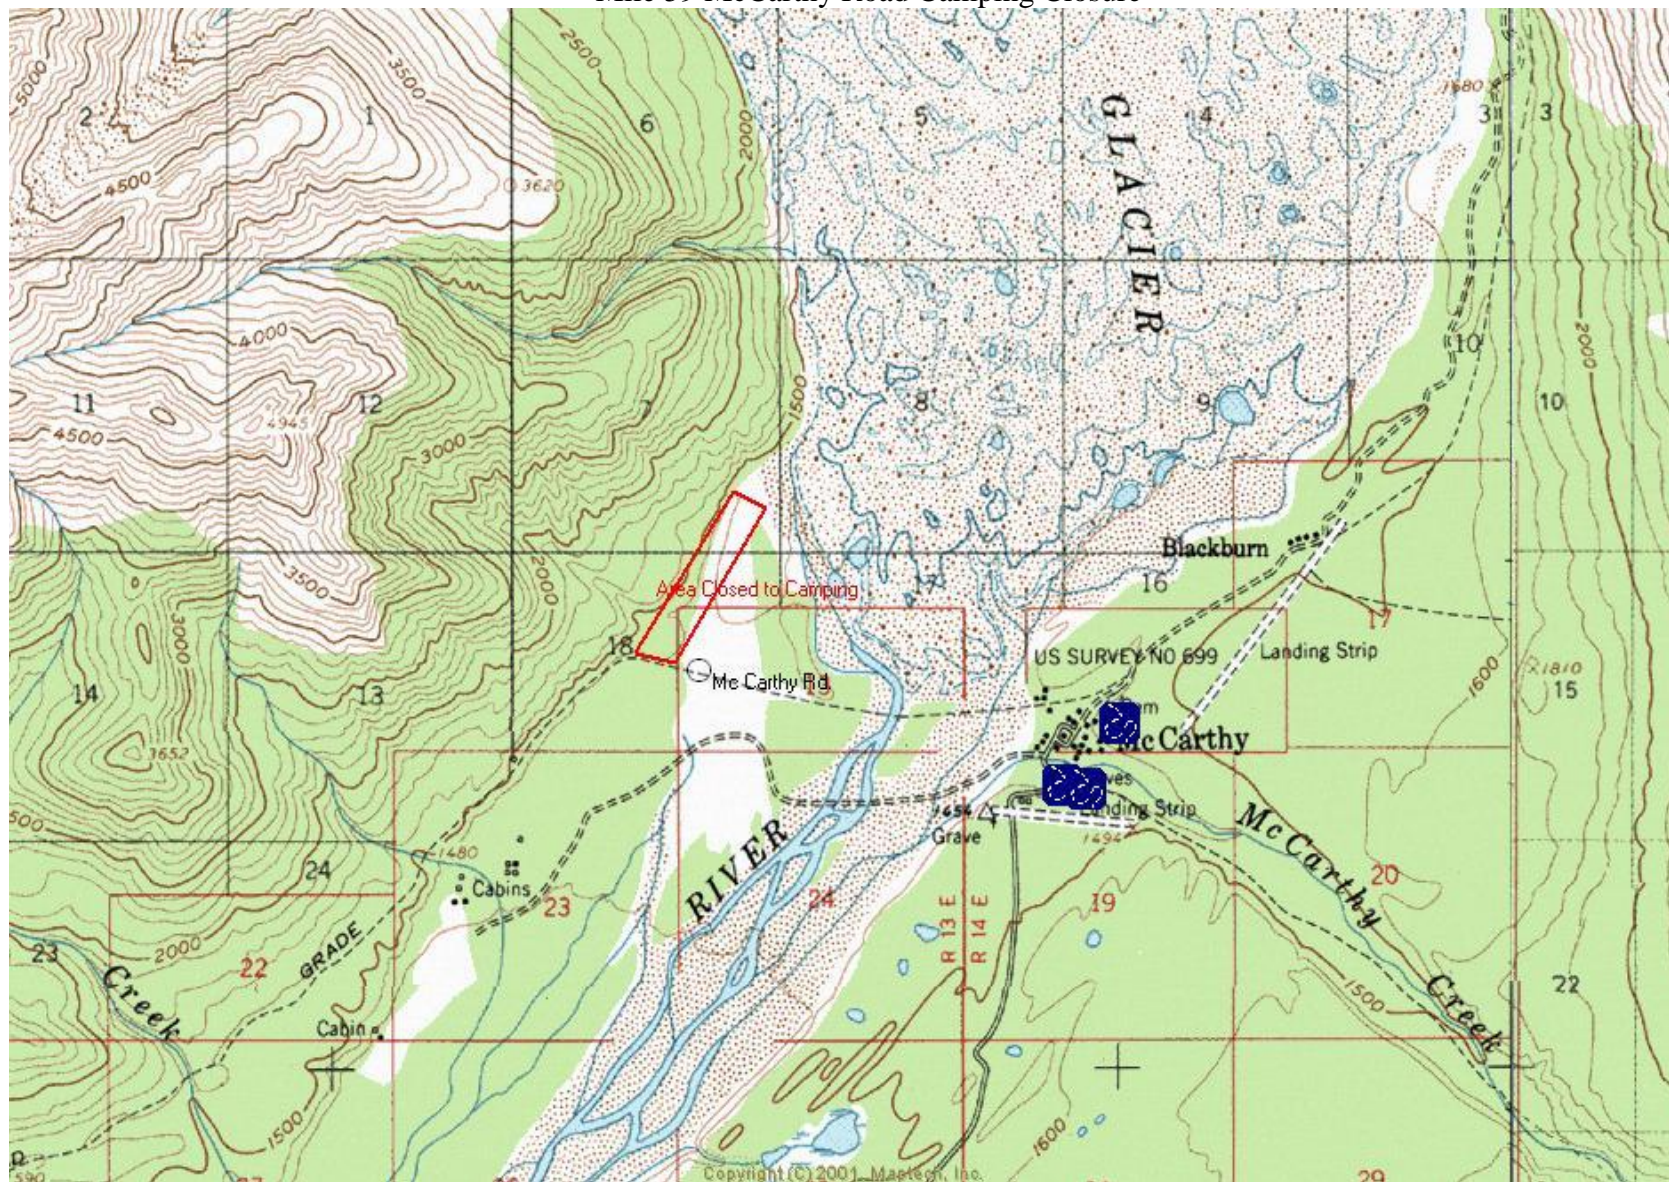

This policy will remain in effect until revoked in writing by the Superintendent.
